 gsanket0903@gmail.com

Willing to work in an organization that would provide me a wide spectrum of experience and exposure to grow & excel in my career and to make meaningful contribution towards the objectives of the organization. I am aspiring for a job profile to develop my skills & talent

Projects

Invoice system:

Simple web application developed in flask. Can be used to create invoice and store it in database.

GreenFresh :

Online E-Commerce website for buying vegetable at your door step. This website is developed in Django and payment gateway is also integrated to let users pay on website itself.

Ride Sharing System :

Android project contains two different application for ride sharing. First application is for users where users can book ride or share ride with another user. Second application is for cab or rikshaw drivers who can see booking, sharing requests of customers.
